

GLOBAL TV

The First Internet TV from INDIA

Behind is a Dream Unfolded Just Like that

RICHNESS IS NO ROCKET SCIENCE

What we create for ourself

India was the richest nation once upon a time! Today we are not! By comparing what we were doing at that point of time that we not doing at this point of time; we can easily understand the way to bounce back and to become the richest nation once again. One single most element of success is in best engagement of maximum number of people. It can be by way of creating employment. It also can be by engaging maximum number of people into a chain of economic activities that can recreate social and cultural integration of the people locally and globally.

We Can Collectively Transform our cities and Villages when we are well connected

Original cannot be duplicated but success can be duplicated. What we create is for ourselves. Collectively we can create what all of us can have the best for each of us! Becoming and being genuine is the way to evoke universal power within us and to spread the same around us. In giving we receive the most precious things in life. Deep desire is the primary thing to achieve excellence. Congruence with thoughts and actions are equally important. Getting into action on a continuous pattern on a regular and recurring basis is also important in achieving excellence. Be Connected! Do Collective!!

FEAST IS A LUNCH OR DINNER BUT WITH EXTRA DISHES

**Few extra dishes can make a lunch
into a memorable feast...**

Initiatives are intensified when people are involved. Keeping in touch with people all across is possible when things are economically viable. Create and nurture innovative initiatives complementary to the existing institutions in the cities. Connect more people in a structured and systematic way. Create and nurture smaller and large scale initiatives that are for the welfare of the people in general. This is possible by identifying the resources and placing people in economic activities.

Creation of employment becomes easier when we know the resources available. Unutilized resources are the fundamental cause for unemployment. Put things in order and place people in charge. We can convert an adverse situation into our advantage.
